
Let's talk “validation”!

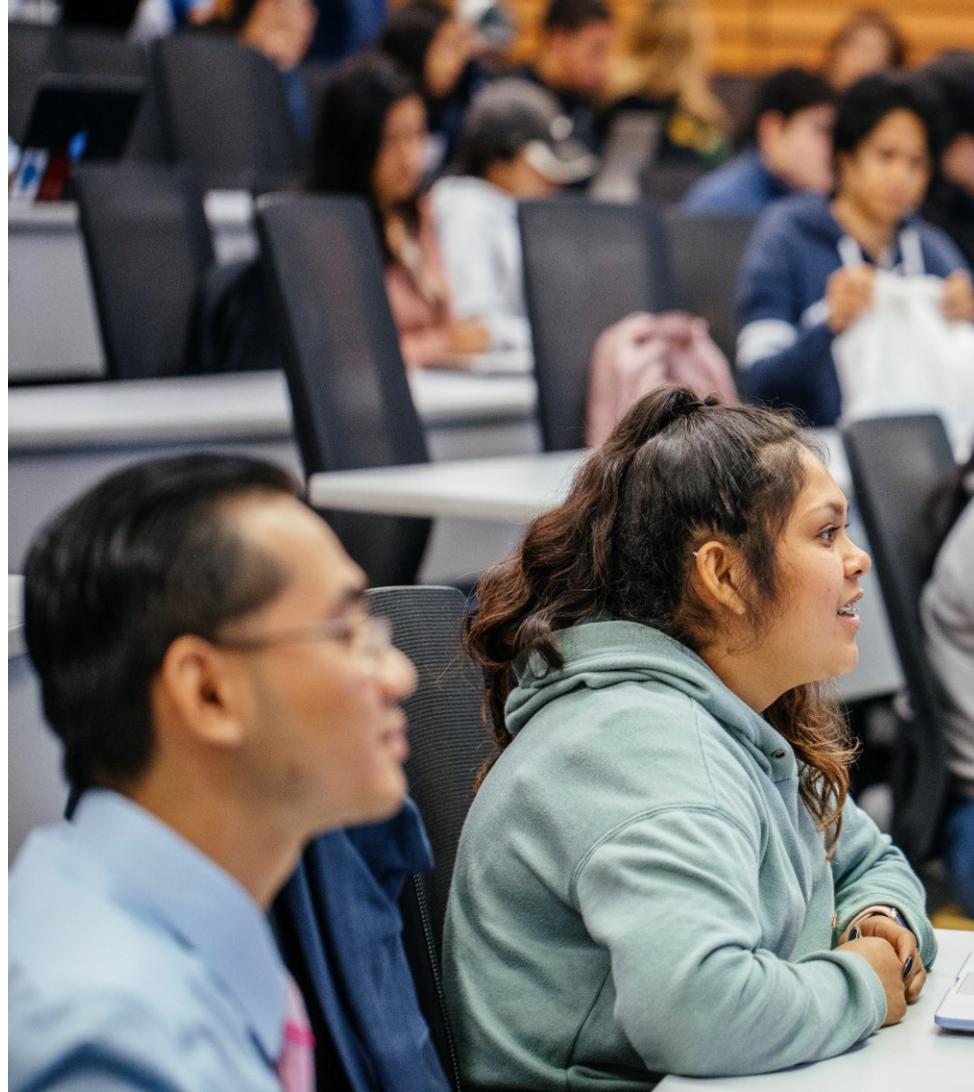

What counselors need to know

UC High School Webinar Series: 2025–26

February 10, 2025

Agenda

- Validation overview
- Validation vs. repeats
- Language other than English (LOTE)
- Mathematics
- Resources

Validation overview

A wide-angle photograph of a modern lecture hall. The room features a curved ceiling with a grid of recessed lighting and blue-painted walls. In the foreground, a lecturer in a blue jacket and khaki pants stands on the left, gesturing towards the audience. The audience, consisting of many students, is seated at long wooden tables arranged in a semi-circle. Many students have laptops open on their desks. The overall atmosphere is professional and academic.

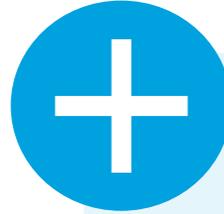

Defining “validation”

- When a student has successfully completed advanced work in an area of sequential knowledge, the student is presumed to have completed the lower-level coursework.
- Validation **only** applies to Areas C (math) and E (LOTE)!

Subject omission

Validation of a lower-level course even if the lower-level course was not actually completed

Grade deficiency

Validation of a D or F grade in a lower-level course after completing a higher-level course with a grade of C or better

Validation only applies to **mathematics (Area C)** and **languages other than English (Area E)** as they are considered sequential subjects.

- Only CSU allows for validation in Chemistry, not UC.
- Only math and LOTE courses completed in 7th and 8th grade are acceptable for A-G because they are sequential subjects.
- Rules are dictated by the course *discipline* as reflected in the A-G course list, not the course title.
- Can apply with a single semester of coursework.

Validation vs. repeats

A wide-angle photograph of a grand, historic library. The room features a high, vaulted ceiling with a grid of decorative panels and a large skylight. The walls are lined with tall bookshelves filled with books. Numerous wooden tables and chairs are arranged throughout the space, with many people sitting and studying. In the foreground, a young man with curly hair is focused on his laptop at a table. The overall atmosphere is one of quiet academic pursuit.

Validation and repeats: What's the difference?

Validation

- Can be used to meet a requirement in which a D or F was originally received or if a lower-level course was not completed.
- Only applies to Areas C and E.
- Requirement is met by successfully completing a *higher-level course*.
- Does **not** replace the original D or F grade in the UC GPA calculation.

Repeat

- Can be used to meet a requirement in which a D or F was originally received.
- Applies to any A-G subject area.
- Requirement is met by successfully completing the *same course*, or a course with a similar curriculum.
- Will replace the original D or F grade in the UC GPA calculation if completed by summer of 11th grade.

Reminder: Students need to report all course attempts in the UC application, even if a course was later repeated or validated.

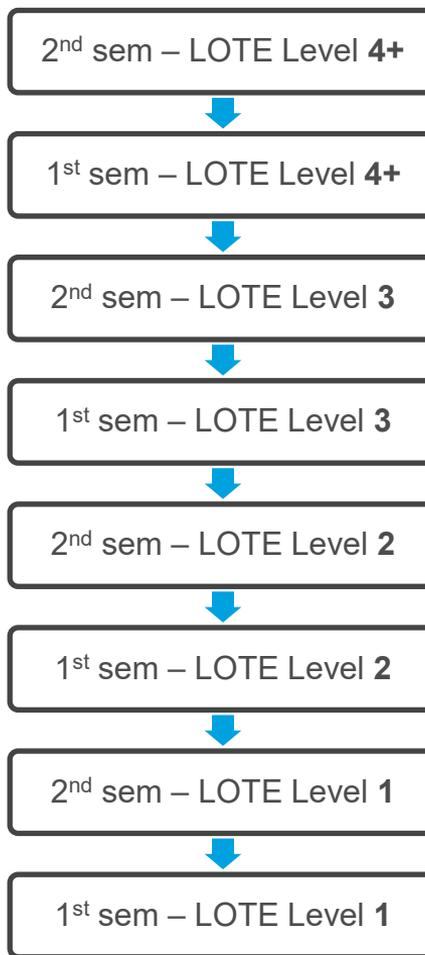

An aerial photograph of a diverse group of students walking on a paved sidewalk. The students are wearing backpacks and casual clothing. Long shadows are cast across the pavement, indicating it is either early morning or late afternoon. The scene is brightly lit, and the pavement is a light gray color.

Language other than English (LOTE)

The basics: What is the Area E requirement?

Two years, or equivalent to the **second level** of high school instruction, of the same language other than English are required. Courses should emphasize speaking and understanding, and include instruction in grammar, vocabulary, reading, composition and culture.

Validation of LOTE

QRG
p.23

Let's practice! LOTE example 1

One of your students is a native speaker and was able to jump into AP Spanish Language and Culture (LOTE Level 4+) but has not taken any other LOTE coursework. They received the following grades.

Have they met the Area E LOTE requirement?

AP Spanish Language & Culture (10th grade)

- Semester 1 = B+
- Semester 2 = A

Yes! By passing AP Spanish Language & Culture, this student has met the Area E LOTE requirement.

Let's practice! LOTE example 2

One of your students received the following grades in their French courses. Have they met the Area E LOTE requirement?

9th grade – French 1

- Semester 1 = A
- Semester 2 = A-

10th grade – French 2

- Semester 1 = C+
- Semester 2 = D

11th grade – French 3

- Semester 1 = B-
- Semester 2 = B

BONUS: Will the D grade from French 2 be calculated in the UC GPA? **Yes**

Yes! By passing French 3, they have validated the deficient grade in second semester French 2.

Mathematics

The basics: What is the Area C requirement?

Three years of college-preparatory mathematics that include the topics covered in **elementary and advanced algebra** and **two- and three-dimensional geometry**; a **fourth year of math is strongly recommended**. A geometry course or an integrated math course with a sufficient amount of geometry content must be completed. Approved integrated math courses may be used to fulfill part or all of this requirement.

Translate, please!

To meet Area C, students need:

Algebra I + Geometry + Algebra II

OR

Math I + Math II* + Math III

**Math II is considered to contain sufficient geometry content and meets the geometry requirement for Area C.*

Additional considerations...

A geometry course – or appropriate integrated math course – must be completed.

A fourth year of math beyond the foundational math requirement is recommended.

7th and 8th grade math coursework is acceptable to meet part or all of the Area C minimum requirement.
6th grade coursework is not accepted.

What's changing?

The Area C math requirement is not changing.

The Area C math requirement is not changing.

The Area C math requirement is not changing.

The Area C math requirement is not changing.

Changes to validation rules are taking effect beginning in fall 2026 (*previously planned for fall 2025*)

- Statistics courses will no longer validate Algebra II/Math III.
- “Additional Math” is a new discipline option and will not validate Algebra II/Math III.
- Validation of geometry grade deficiency by a higher-level course no longer allowed.

The applicable math validation rules are based on **when a student completes the higher-level course**, not their intended application or entry term to UC.

A yearlong geometry course – or appropriate integrated math course (Math II) – is required.

- Validation of Geometry* **omission** is not allowed.
- Validation of Geometry* **grade deficiency** has been allowed but will no longer be accepted beginning in fall 2026.

**Single-subject Geometry*

Additional geometry considerations...

The second semester of a Geometry course **will** validate the omission or deficient grade in the first semester of Geometry.

Challenge exams are accepted for students who have not met the geometry course requirement.

Validation...

- Does not include any Computer Science coursework approved under Area C.
- Can apply at the semester level (i.e., semester 2 validates semester 1 of a course).
- Is distinct for single-subject vs. integrated math curriculums.
- Rules are dictated by the **course discipline** as reflected in the A-G course list, not the course title.

Course discipline on A-G course list

C Mathematics 3 years required, 4 years recommended ?			
★	▼ AP Calculus AB	Calculus	Classroom-based
★	▼ AP Calculus BC	Calculus	Classroom-based
★	▼ AP Computer Science A	Computer Science	Classroom-based
	▼ Data Science and Statistics 1: A Modeling Approach	Statistics	Classroom-based
	▼ Integrated Math III P	Mathematics III	Classroom-based
	▼ Math 1 P	Mathematics I	Classroom-based
	▼ Math I Enrichment H	Mathematics I	Classroom-based
	▼ Math II Enrichment H	Mathematics II	Classroom-based
	▼ Math II P	Mathematics II	Classroom-based
★	▼ Pre-Calculus H	Pre-Calculus	Classroom-based

Why this matters? Financial Algebra example

Financial Algebra

Mathematics III **C** Mathematics

Grade ? 11 12

Full Year, Classroom-based

Algebra-Financial

Additional Math **C** Mathematics

Grade ? 12

Full Year, Classroom-based

Financial Algebra

Algebra II **C** Mathematics

Grade ? 11 12

Full Year, Classroom-based

Financial Algebra

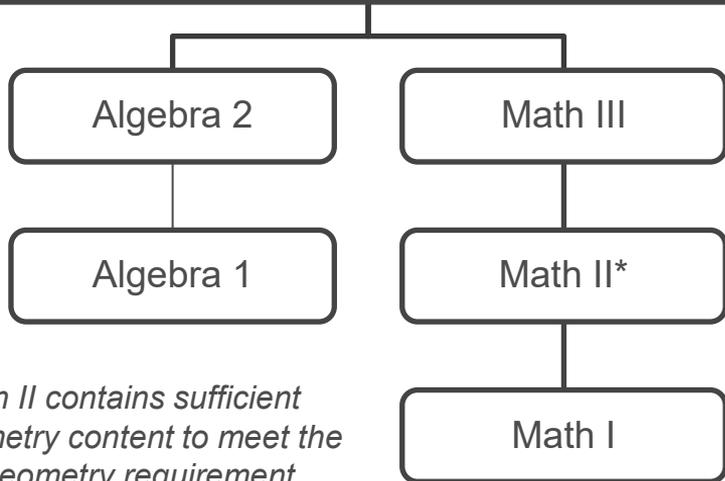

Algebra I **C** Mathematics

Grade ? 9 10

Full Year, Classroom-based

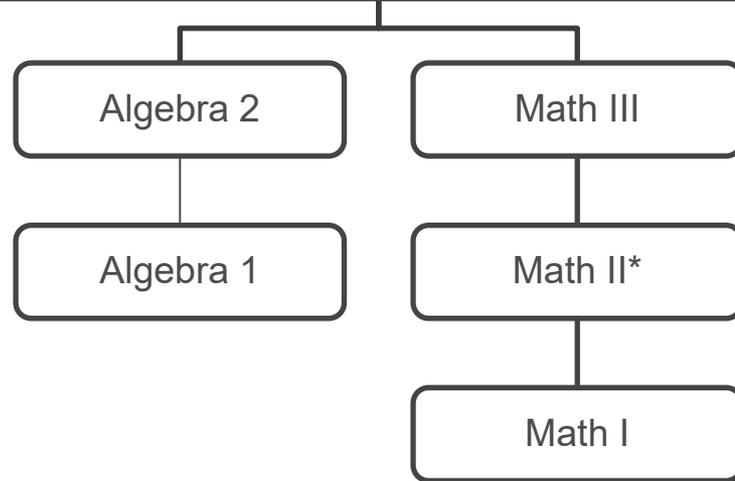

(through summer 2026)
Precalculus, Calculus, Other Advanced Math, Statistics, Additional Math

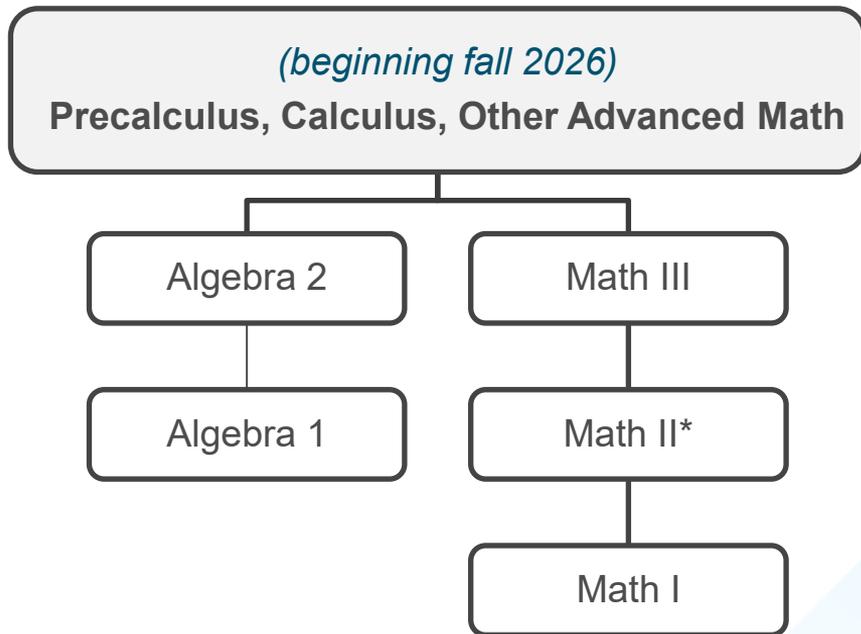

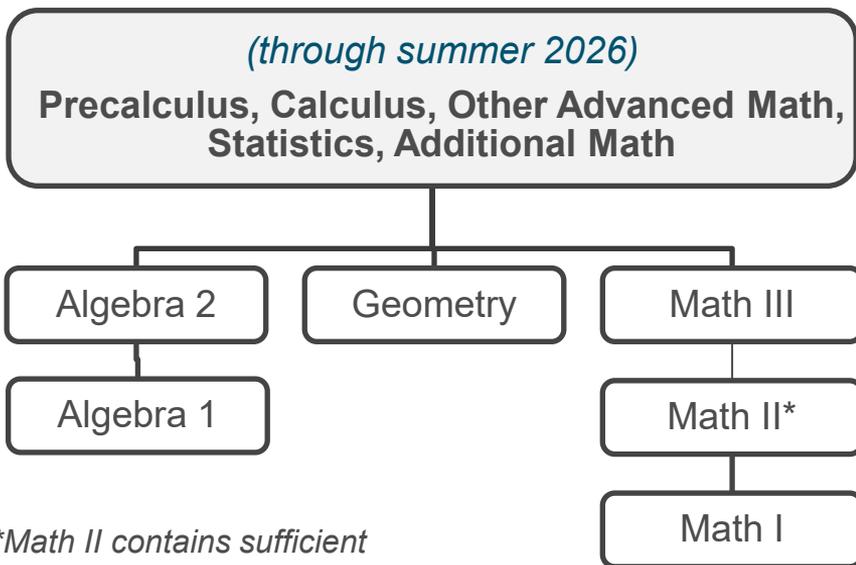

**Math II contains sufficient geometry content to meet the UC geometry requirement*

(beginning fall 2026)
Precalculus, Calculus, Other Advanced Math

Statistics and Additional Math courses taken in fall 2026 or beyond are viable options for an additional year of math but will not validate lower-level coursework.

**Math II contains sufficient geometry content to meet the UC geometry requirement*

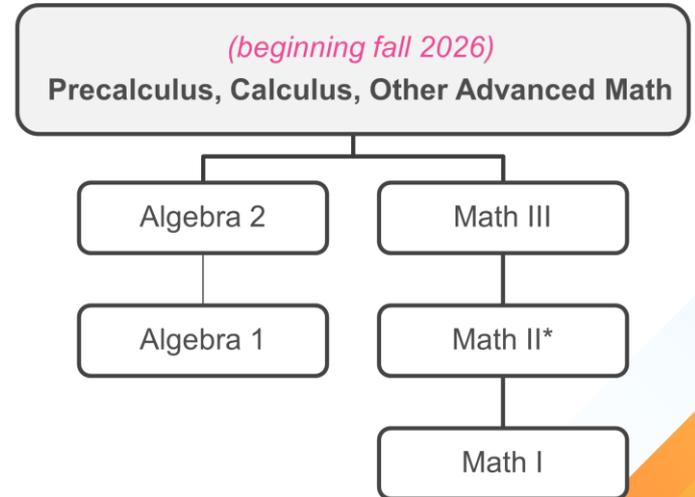

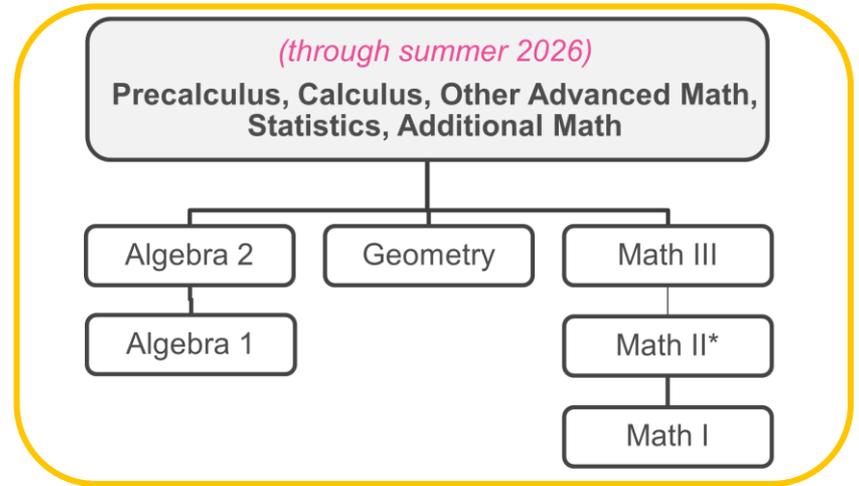

Statistics and Additional Math courses taken in fall 2026 or beyond are viable options for an additional year of math but will not validate lower-level coursework. A higher-level math course will no longer validate a deficient grade in geometry.

Let's practice! Math example 1

You're talking with a student with the following coursework. Do they meet the Area C requirement?

- 8th grade – Algebra I – A, A grades
- 9th grade (AY2324) – Geometry – B, B grades
- 10th grade (AY2425) – Algebra II – C, D grades
- 11th grade (AY 2526) – Statistics – A, B grades

Answer: Math example 1

You're talking with a student with the following coursework. Do they meet the Area C requirement?

- 8th grade – Algebra I – A, A grades
- 9th grade (AY2324) – Geometry – B, B grades
- 10th grade (AY2425) – Algebra II – C, D grades
- 11th grade (AY 2526) – Statistics – A, B grades

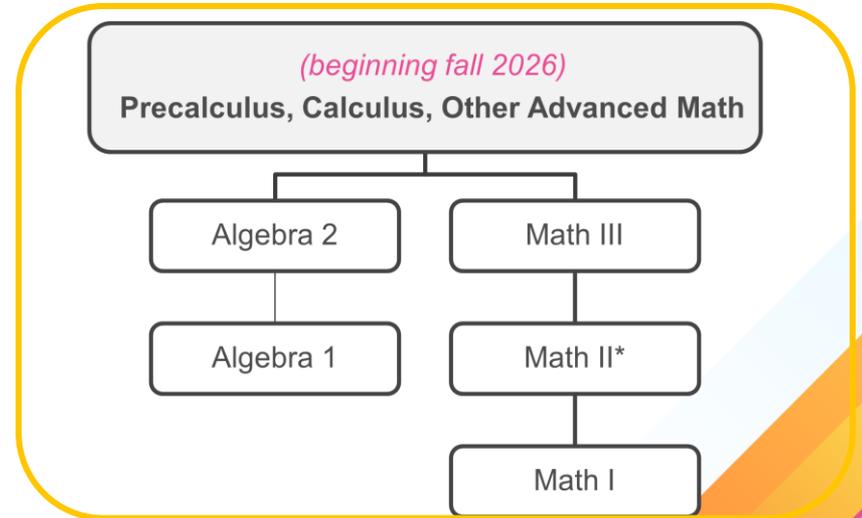

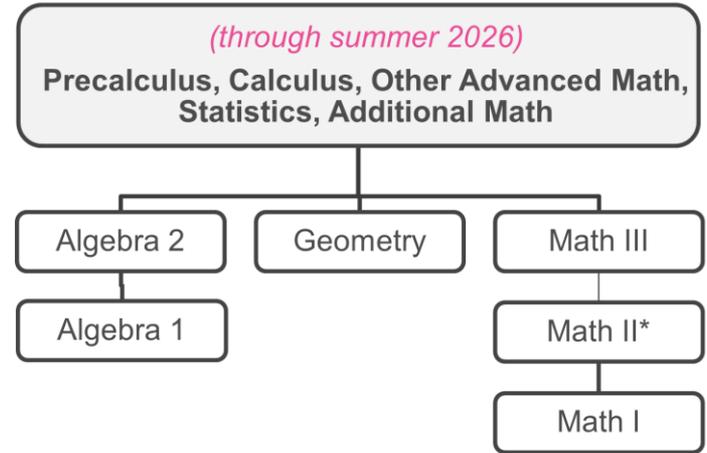

Yes! A Statistics course completed in academic year 2025-26 can validate the grade deficiency in Algebra II.

Let's practice! Math example 2

You're talking with a student with the following coursework. Do they meet the Area C requirement?

- 8th grade – Algebra I – A, A grades
- 9th grade (AY2425) – Geometry – B, B grades
- 10th grade (AY2526) – Algebra II – C, D grades
- 11th grade (AY2627) – Statistics – A, B grades

You're talking with a student with the following coursework. Do they meet the Area C requirement?

- 8th grade – Algebra I – A, A grades
- 9th grade (AY2425) – Geometry – B, B grades
- 10th grade (AY2526) – Algebra II – C, D grades
- 11th grade (AY2627) – Statistics – A, B grades

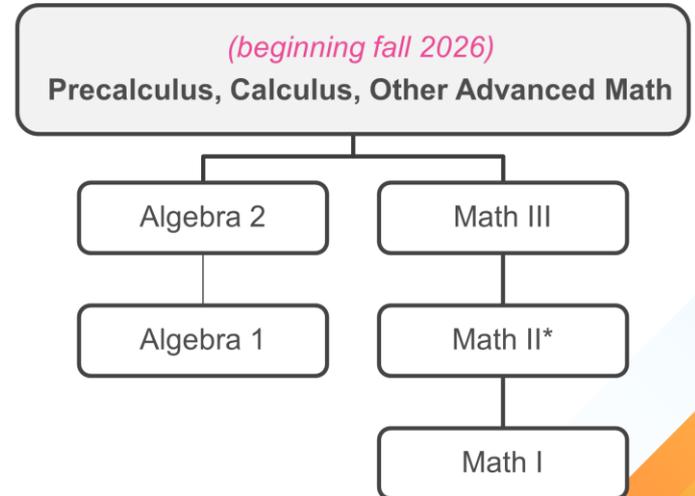

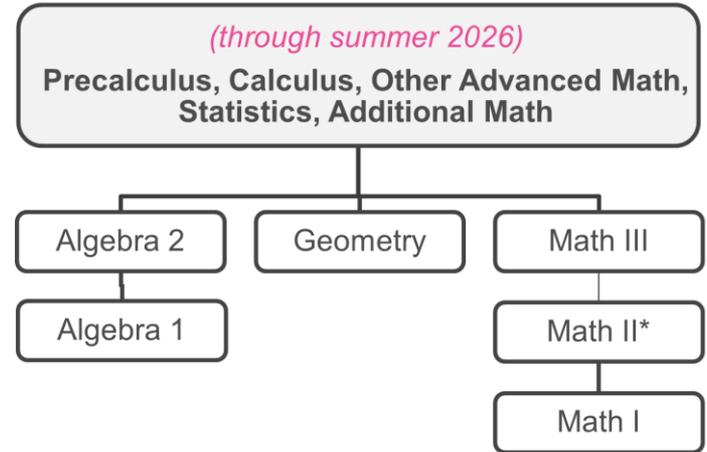

No! A Statistics course completed in academic year 2026-27 can no longer validate a grade deficiency in Algebra II.

Let's practice! Math example 3

You're talking with a student with the following coursework. Do they meet the Area C requirement?

- 9th grade (AY2324) – Math I – B, B grades
- 10th grade (AY2425) – Math II – D, F grades
- 11th grade (AY2526) – Math III – C, B grades
- 12th grade (AY2627) – Statistics – In Progress

Answer: Math example 3

You're talking with a student with the following coursework. Do they meet the Area C requirement?

- 9th grade (AY2324) – Math I – B, B grades
- 10th grade (AY2425) – Math II – D, F grades
- 11th grade (AY2526) – Math III – C, B grades
- 12th grade (AY2627) – Statistics – In Progress

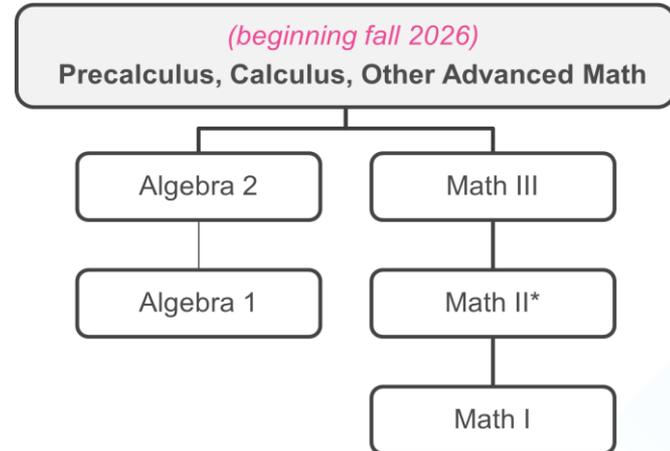

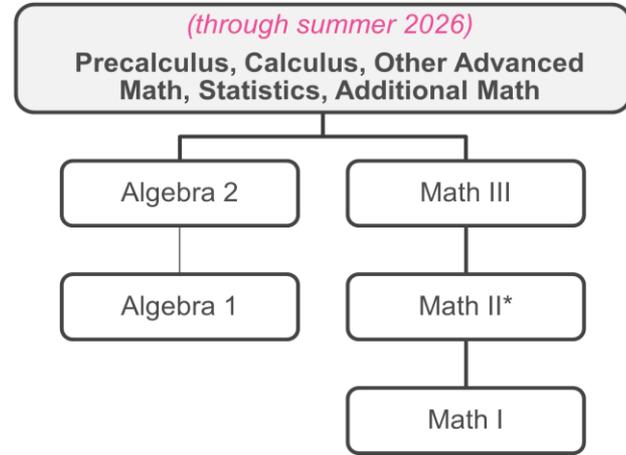

Yes! The student validated the grade deficiency in Math II by passing Math III and has therefore met the Area C minimum requirement.

Let's practice! Math example 4

You're talking with a student with the following coursework. Do they meet the Area C requirement?

- 9th grade (AY2324) – Algebra 2 – A, A grades
- 10th grade (AY2425) – Precalculus – A, B grades
- 11th grade (AY2526) – Calculus – B, A grades
- 12th grade (AY2627) – Statistics – In Progress

You're talking with a student with the following coursework. Do they meet the Area C requirement?

- 9th grade (AY2324) – Algebra 2 – A, A grades
- 10th grade (AY2425) – Precalculus – A, B grades
- 11th grade (AY2526) – Calculus – B, A grades
- 12th grade (AY2627) – Statistics – In Progress

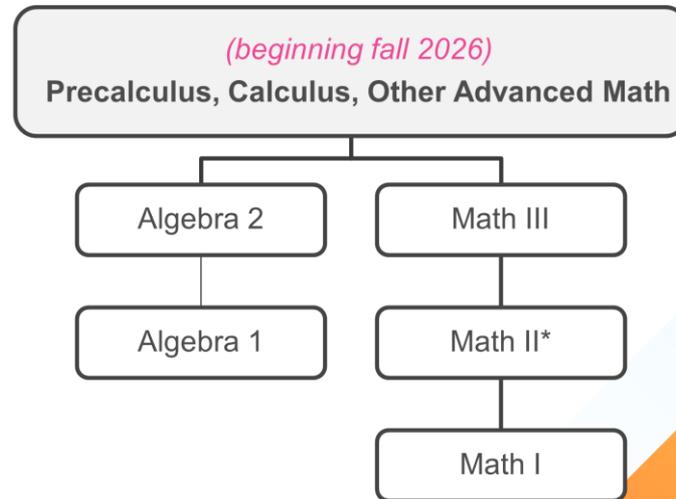

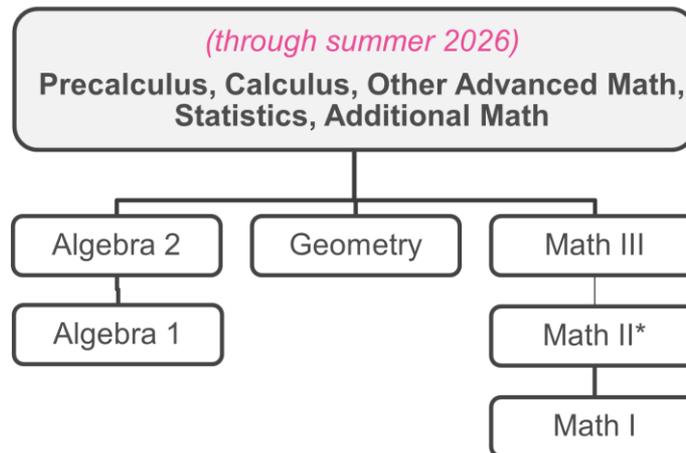

No. Unless the student completed geometry in 7th or 8th grade, this student has not met the geometry requirement for Area C. The omission of geometry cannot be validated by any higher-level coursework.

Let's practice! Math example 5

A student took geometry in 10th grade (AY2324) but did not pass. They then passed Algebra II in their junior year (AY2425).

Have they met the Area C requirement?

Answer: Math example 5

A student took geometry in 10th grade (AY2324) but did not pass. They then passed Algebra II in their junior year (AY2425).

Have they met the Area C requirement?

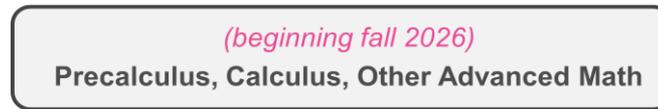

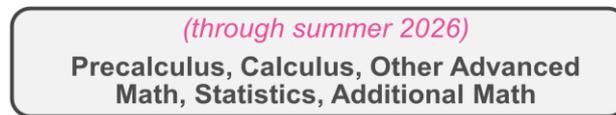

No; Algebra II does not validate a grade deficiency in geometry regardless of when the course was taken. A more advanced course (ex. Precalculus, Calculus) could validate that deficiency, but only if completed prior to fall 2026.

Let's practice! Math example 6

A student took the following coursework.

Do they meet Area C requirements?

- 9th grade – Math II – First semester only – A
- 10th grade – Math III – A, A

Answer: Math example 6

A student took the following coursework.

Do they meet Area C requirements?

- 9th grade – Math II – First semester only – A
- 10th grade – Math III – A, A

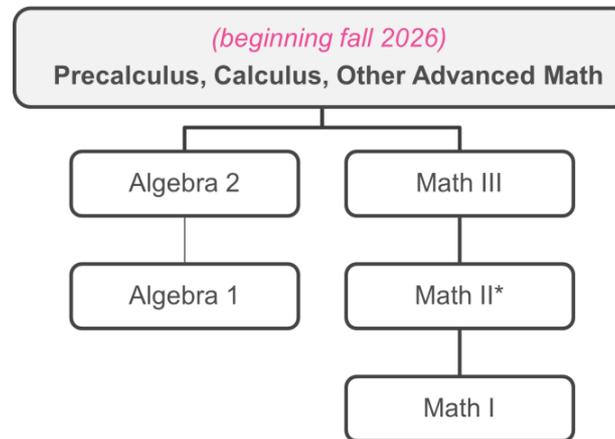

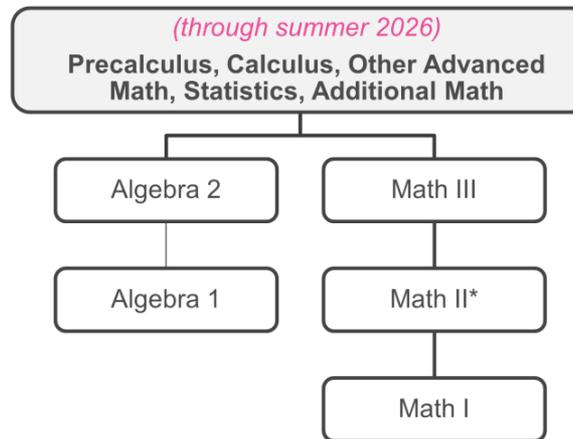

Yes! Math III will validate the omission of that second semester of Math II.

Final challenge question

What if that same student transferred high schools after 9th grade and instead took the following coursework.

Do they meet Area C requirements?

- 9th grade – Math II – First semester only – A
- 10th grade – Algebra II – A, A

Answer: Final challenge question

What if that same student transferred high schools after 9th grade and instead took the following coursework.

Do they meet Area C requirements?

- 9th grade – Math II – First semester only – A
- 10th grade – Algebra II – A, A

No! Must reference validation rules for Algebra II.

Algebra II cannot validate geometry (or Math II). Therefore, this student is missing a semester in geometry.

Resources

A photograph of the University of California sign, which is a large, ornate metal structure with a green patina. The sign features the words "UNIVERSITY OF CALIFORNIA" in large, gold, serif capital letters. The sign is set against a background of dense green trees and a clear sky. In the foreground, there are green bushes and a large, light-colored flower. A white rectangular box with the word "Resources" in blue text is overlaid on the top left of the image.

UNIVERSITY OF CALIFORNIA
